Transition Type 1: For initiation at intubation or following SAT

**START**

**OPIOID LOAD**

**PAIN ABOVE GOAL**
- ADD OPIOID INFUSION Notify Provider
  - ≥ 4 PRN doses within 4 hours

**PAIN AT GOAL**
- MAINTENANCE PRN OPIOID

**PAIN ABOVE GOAL**
- OPIOID BOLUS FOR ACUTE PAIN
  - Notify Provider

**PAIN ABOVE GOAL**
- OPIOID BOLUS FOR ACUTE PAIN
  - Notify Provider

**PAIN AT GOAL**
- MAINTENANCE PRN OPIOID

**PAIN AT GOAL**
- MAINTENANCE PRN OPIOID

**RASS BELOW GOAL**
- INCREASE OPIOID INFUSION RATE
  - ≥ 3 fentanyl or ≥ 2 hydromorphone PRN doses within 3 hours

**RASS AT GOAL**
- OPIOID INFUSION ONLY
  - HOLD OPIOID INFUSION UNTIL RASS AT GOAL. RESUME AT ½ PREVIOUS RATE IF PAIN

**RASS AT GOAL**
- OPIOID INFUSION + SEDATIVE
  - WEAN SEDATIVE FIRST

**RASS AT GOAL**
- OPIOID INFUSION + SEDATIVE
  - WEAN SEDATIVE AS ABLE

**RASS ABOVE GOAL**
- ADD & TITRATE SEDATIVE Notify Provider

**Friendly Reminder**
- After an SAT, if infusion(s) need to be restarted, please resume at one-half of previous rate 😊

---

**Assessments**

<table>
<thead>
<tr>
<th>Scale</th>
<th>Tool &amp; Goals</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pain</td>
<td>NRS ≤ 3 (preferred) or CPOT ≤ 2</td>
<td>Every 4 hrs or within 30-60 minutes after intervention</td>
</tr>
<tr>
<td>Sedation</td>
<td>RASS 0 to -1</td>
<td>Every 12 hrs</td>
</tr>
<tr>
<td>Delirium</td>
<td>CAM-ICU negative</td>
<td>Every 12 hrs</td>
</tr>
</tbody>
</table>

---

**Pain, Agitation, Delirium Flowsheet**

Is patient comfortable and at goals?
- Patient *awake* as much as possible
- Treat *pain* first (analgosedation)
- Delirium prevention/sleep enhancement
- Patient *mobilized* as soon as possible
- Patient *extubated* as soon as possible

---

**Friendly Reminder**
- After an SAT, if infusion(s) need to be restarted, please resume at one-half of previous rate 😊
### Pain, Agitation, Delirium Flowsheet

**Is patient comfortable and at goals?**

- Patient *awake* as much as possible
- Treat *pain* first (analgesedation)
- Delirium prevention/sleep enhancement
- Patient *mobilized* as soon as possible
- Patient *extubated* as soon as possible

---

**Transition Type 2:**

*For initiation while keeping on infusions*

![Flowchart Diagram]

- **PAIN ABOVE GOAL**
  - **OPPIOID BOLUS FOR ACUTE PAIN**
  - **REASSESS**
    - ≥ 3 fentanyl or ≥ 2 hydromorphone PRN doses within 3 hours
  - **INCREASE OPIOID INFUSION RATE**

- **PAIN AT GOAL**
  - **ASSESS RASS**

- **RASS BELOW GOAL**
  - **OPPIOID INFUSION ONLY**
  - HOLD OPIOID INFUSION UNTIL RASS AT GOAL. RESUME AT ½ PREVIOUS RATE IF PAIN
  - **WEAN SEDATIVE FIRST**
    - SEDATIVE OFF AND RASS STILL BELOW GOAL

- **RASS AT GOAL**
  - **OPPIOID INFUSION ONLY**
  - **WEAN SEDATIVE AS ABLE**
    - No opioid PRN in 4 hours
  - **OPPIOID INFUSION + SEDATIVE**
    - No opioid PRN in 4 hours
